

More Than Just Internet

Kajeet Managed™

Help students succeed by providing more than just Internet outside the classroom.

Our **Kajeet Managed™** plan is a turn-key program that fully supports your technology initiatives. We handle the data and filters; you can sit back and watch your students succeed. Simple for students and less work for educators.

15GB

**OF EDUCATION DATA PER MONTH
PER STUDENT WITH 500MB PER DAY**

"The biggest advantage we've seen with Kajeet is the filtering, making sure that we're CIPA compliant and being able to manage bandwidth and overage charges. We wanted to make sure [students] were using it appropriately – using it for education and not just streaming entertainment."

– Jeff Mozdierz, Director of Technology for Pontiac School District
