

# Education Broadband™ Program

Kajeet enables schools and districts to provide off-campus connectivity for disadvantaged students to complete required assignments and homework -- without worry of abuse.

- Maximize the potential of your 1:1 or BYOD programs.
- Increase student performance.
- Level the digital playing field for economically disadvantaged students.
- Keep students focused on academic-related content.

## Kajeet Managed Plan

**A turn-key program managed by education broadband experts!**

### No need to worry about burdening your staff

In the *Kajeet MANAGED* Education Broadband Program, districts and schools leverage Kajeet's expertise in designing and deploying off-campus, academic Internet connectivity. Simply choose the number of Kajeet SmartSpots™ and the number of months of service required. Kajeet assigns an experienced Education Program Manager (EPM) to serve as an extension of the district team to manage and administer the program including: policies and filters for student use for specific academic content; time of access restrictions; data consumption and site monitoring; program analysis and reporting; and much more!

### Filtered education broadband access and fair use policy

Under this turn-key program, the school or district is not limited on bandwidth for educational sites. However, the Kajeet Managed Education Broadband Program is intended for educational use only with one device per student. In the event Kajeet detects bandwidth consumption inconsistent with educational use, Kajeet may temporarily block such service while conducting further review. This learning system allows Kajeet to continually refine our solution to deliver the most cost-effective education broadband service possible and to identify new potential threats to students quickly and efficiently.

## Kajeet Choice Plan

**Complete control over your off-campus broadband program!**

### Give your school or district complete control

With the *Kajeet CHOICE* Education Broadband program, schools and districts are in complete control of their off-campus, academic Internet connectivity.

The school or district team manages and administers the program through the patented, easy-to-use, **Sentinel® Administrative Portal** including:

- Policies and filters for student use for specific academic content
- Time of access restrictions
- Data consumption flags and site monitoring
- Program analysis and reporting
- And much more!

Simply choose the number of Kajeet SmartSpots™ need to serve your economically disadvantaged students and the amount of data required – its that easy!

### Data is pooled and shared across all devices

Under this turn-key program, schools or districts purchase cost-effective, discounted data in bulk. The data pool is placed in the Sentinel account. The pooled data is available for use across all devices. Data does not expire and rolls-forward each month. Additional data can be added to the account at any time.

The portable Kajeet SmartSpot and Sentinel Portal allow for complete control of the student's off-campus academic Internet experience

**Find out how you can implement a cost-effective solution to bridge your digital divide.**

# Choose the Kajeet Education Broadband plan that fits your unique needs

## 1. Choose the plan: how will the program will be managed

### Kajeet CHOICE

Program Management: District or School

After initial set-up and training, the school or district manages the entire program through our cloud-based Sentinel® administrative portal including filters, whitelisting & blacklisting, time-of-day limits, device administration, and reporting & analysis.

#### Pooled, Non-Expiring Data Plan

Kajeet Choice accounts purchase data in bulk. The data pool is placed in the client account. The pooled data is available across all devices. Data does not expire and rolls-forward each month. For each month a device is in service, one (1) monthly activation "Point" will be consumed.

### Kajeet MANAGED

Program Management: Kajeet

Kajeet will assign an experienced Education Program Manager to administer and managed the entire program for the school or district including onboarding, training, filter and device administration, reporting, and technical support.

#### Convenient, Pay Per device/month

Kajeet Managed accounts simply pay a flat monthly rate for education-only broadband based on the total number of devices serviced under the program. Education Program Manager Fees will be charged for programs with fewer than 100 devices in service.

## Both Plans Come With Exclusive, CIPA-Compliant Kajeet Education Filters

Kajeet comes with default filters by grade group to help you get started.

Child Internet Protection Act Compliant

Education Content Only Access

## 2. Choose your preferred wireless network

Kajeet Education Broadband is available on two of the nation's fastest and farthest reaching 4G LTE wireless networks. You can choose the network with the best coverage in your area.

## 3. Determine the number of devices needed

There are many ways to distribute and use the Kajeet SmartSpot: The two most popular applications are through a Library/Media Center Checkout program for on-demand need or providing SmartSpots for the year or semester to students with need. Not sure how many students require connectivity? A great rule of thumb is to take 20-25% of the number of Free Lunch Students. If you already have devices (e.g. laptops, tablets, Chromebooks) with embedded LTE chips, we can filter those as well.

## 4. Determine the number of months of service required

At Kajeet, we have no term or contract minimums. Most schools and districts manage the program per academic year, some keep all or a portion of the devices active during the summer months, while others operate multi-year programs.

## 5. Select the device procurement option

### Purchase

Kajeet SmartSpots can be purchased by the school or district. This procurement option is ideal for programs that expect to have a lifecycle of 2 or more years.

### Lease

Leasing SmartSpots allows schools or districts the flexibility to begin the program at a lower cost. Leases are a great option if the program lifecycle has yet to be determined. 10 mo. min. required for lease.
